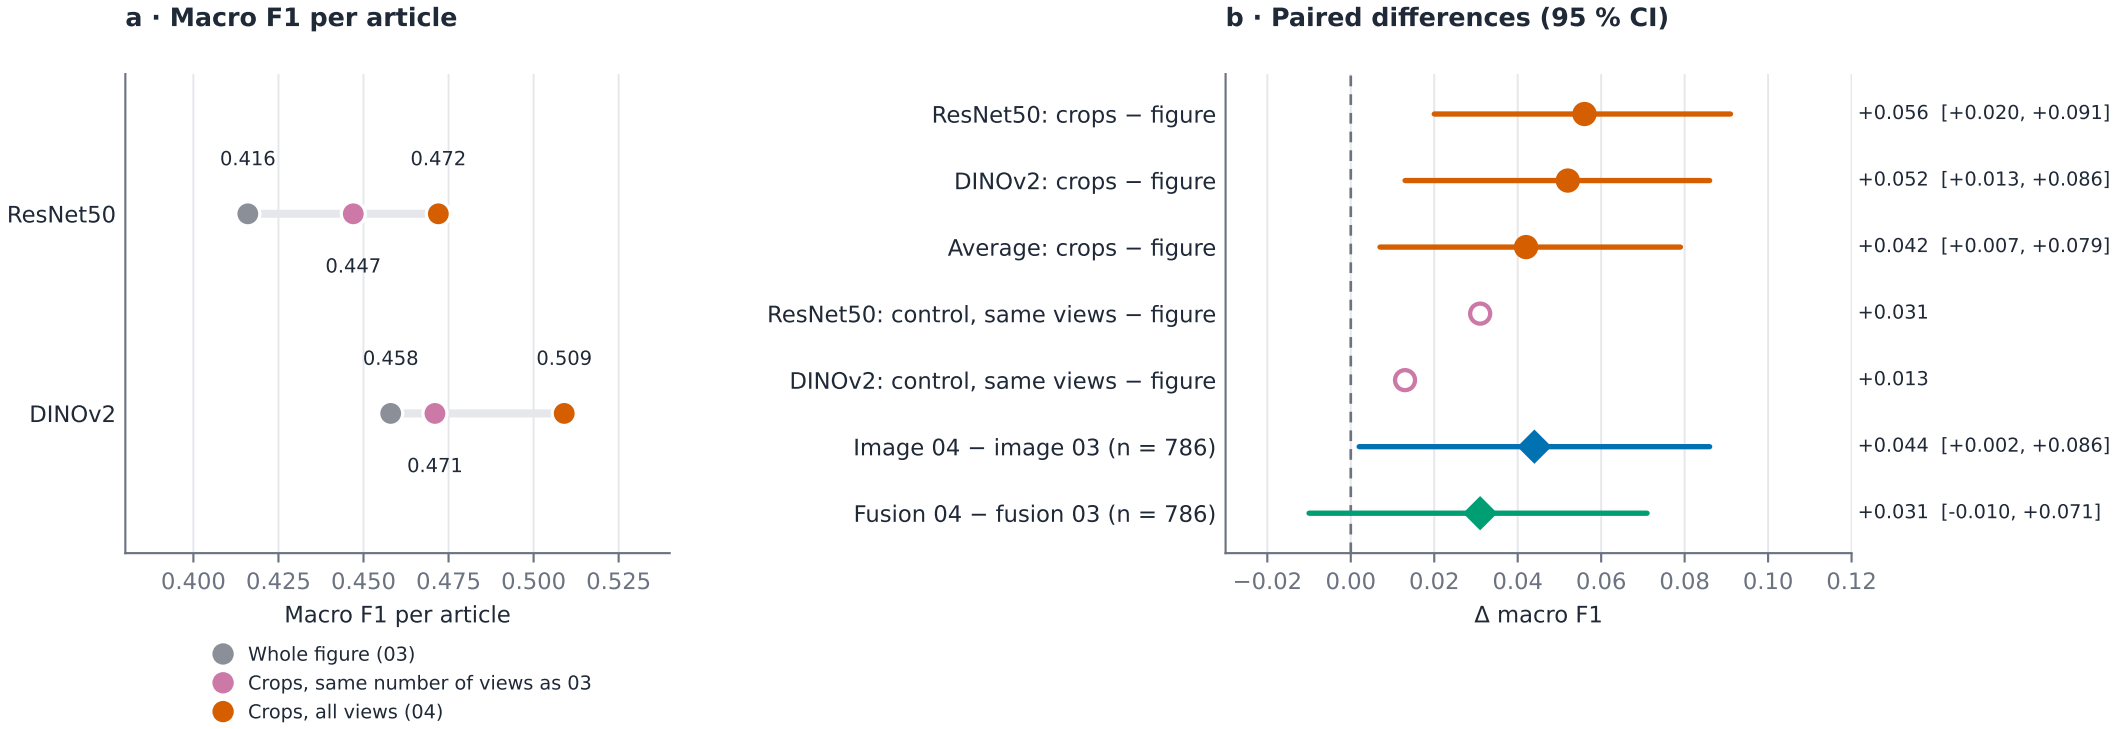
Figure 2 · From the whole figure to panel crops (article level)



n = 1,112 articles in (a) and the first 3 rows of (b); n = 786 in the last 2 (articles with a whole figure, crops and measurements). 95 % CI by article bootstrap (2,000). Hollow points are the mean of 200 draws, no CI.
Sources: modelos/comparacion/ANALISIS_04_RECORTES.md and ANALISIS_FUSION_04.md. With the same number of views per article the crop advantage shrinks (control); the CI of 'fusion 04 − fusion 03' includes 0.
